J. R. CLARKE (to 31.7.62)

Mr. Chairman, Ladies and Gentlemen,

I have the honour to present the Annual Report on the Health, Vital Statistics and Sanitary Conditions of the West Kesteven Rural District for the year 1962.

The small increase in Infant Mortality was probably due to chance variation. The table of Infectious Diseases shows an exceptionally good record, there being very few notifications of such diseases and no deaths from the diseases listed 1 - 9 in the Table of causes of death.

Unfortunately, however, the number of deaths from cancer of the lung (8) was the largest ever recorded in the rural district. Much has been made of the fact that the death-rate from this disease is lower in rural areas than in towns, but I suspect that the rural districts will catch up on their urban neighbours in time. There is no doubt that this disease is almost entirely preventable, the remedy being to abandon cigarette smoking.

Nine deaths from accidents were also recorded; these are all preventable in principle, though not always easily prevented.

The following comments are included by direction of the Ministry of Health:

Water Supply. Details will be found on pages 12 - 15.

Since 1st October, 1962 public water supplies throughout the district have been administered by the Kesteven Water Board.

- (a) Generally speaking the supply was adequate in quality and quantity.
- (b) Details of bacteriological examinations are shown on pages 12 and 14. No chemical analysis was made during 1962.
- (c) No evidence of plumbo-solvency is known.
- (d) The one unsatisfactory bacteriological result in the case of treated water was due to stagnation in a dead-end and was remedied by flushing out.
- (e) As shown on Page 13, 96% of the houses in the District have a piped water supply; it is not known how many of these are supplied by standpipes. I estimate therefore that 4% of the population or about 750 persons are without a piped supply.

Public Swimming Baths. There are none in the District.

Sewerage. Details are given on Pages 20 and 21. It will be seen that the Caythorpe scheme was completed during the year, while schemes for three other parishes were under construction. The position is, however, still far from satisfactory. In particular it is regrettable that the new Barrowby scheme could not be commenced during 1962; this is urgently needed owing to the growth of the village and the obsolescence of the old works.

Common Lodging Houses. There are none in the District.

The six small slaughterhouses operating in the District were finally closed at the end of January, 1962.

The work of the Department was greatly handicapped by the unfortunate illness of Mr. Dean, and I must pay tribute to Mr. Johnson and Mr. Lucas for the excellent way in which they have carried out the extra duties falling on them.

In conclusion, I wish to thank all members of the Council, and in particular the Health Committee, Mr. Morgan and all his staff for their unfailing courtesy and help throughout the year.

I am, Sir, Ladies and Gentlemen,
Your obedient Servant,
C. W. SHEARER.
Medical Officer of Health.

ANNUAL REPORT OF THE CHIEF PUBLIC HEALTH INSPECTOR FOR 1962.

Public Health Department,
Council Offices,
Sendon Close, Grantham.

To the Chairman and Members of the
West Kesteven Rural District Council.

Mr. Chairman, Ladies and Gentlemen,

In the unfortunate absence of your Chief Public Health Inspector, Mr. J. Dean, I have the honour to present the report for the year ended 31st December, 1962.

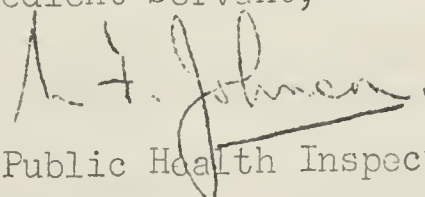

Two important events took place during 1962 which deserve special mention. On the 31st January all the private Slaughterhouses were closed and the Butchers in the District began using the new Abattoir in the Borough of Grantham. The Kesteven Water Board officially came into operation on 1st October and our responsibility for mains and services came to an end. These two items of interest are dealt with more fully in the report.

During the year progress in Housing, Sewerage and Slum Clearance was maintained and once again it has been proved that when Sewerage is available in the villages it attracts the private developer. Caythorpe is now sewered and the private development of 50 houses is now in progress. Council House development in some of the villages is being retarded by the lack of suitable means of sewage disposal. The Council are making good progress with their Sewerage Schemes, but unfortunately in an area of small villages this is an expensive necessity.

The sudden illness of Mr. Dean in October was a severe blow to the Department. It is due entirely to his organization over the past years that without the mainstay of the Department, the work has been carried on, if not as efficiently, in a manner that has brought few complaints. This speaks highly of all the members of the Staff who have produced that little extra and contributed to the smooth running of the Department under difficult circumstances.

I could not submit this report without mentioning Mr. Lucas, and Mr. Roberts, the Chief Clerk of the Department. Without their help life would have been most difficult, and I cannot speak too highly of their efforts since Mr. Dean was taken ill. In conclusion I would like to thank all those Councillors who have helped us over the past year. I speak for all the members of the Department when I say that what may seem small and insignificant matters to you, are often the means of saving us many hours of inquiries. The full co-operation of Councillors and officials both formally and informally goes a long way to producing an efficient service.

I am, Sir, Ladies and Gentlemen,
Your obedient Servant,

Senior Additional Public Health Inspector.

1. DWELLINGHOUSES INSPECTED

(a) Inspections for Housing Defects	33
(b) Dwellinghouses found unfit	70
(c) Dwellinghouses found not fit in all respects	56
(d) Re-inspections and visits to work in progress	234

WATER SUPPLY.

The Kesteven Water Board came into operation on 1st October, 1962 and from that date this Council ceased to administer the water supplies in the area. Since the end of the war this Council has laid 150 miles of water mains with ancillary works which is a record to be proud of. Together with parts of the area previously supplied by the Grantham Waterworks Company, 92% of the premises in the District enjoyed a piped water supply from the mains.

Close co-operation exists between this department and the new Board, and it is essential to the well being of the Ratepayers that this happy relationship continues. Four members of the Staff (directly connected with water supplies) went over to the Board and I am sure that their knowledge of the district will be a great asset to the smooth working of this new venture.

One of the good things that has emanated from the formation of the new Board is the closing down of the Long Bennington Borehole except in the case of emergency. The villages previously supplied from this source are now supplied from the Drove End Source at Sleaford. This is from an Artesian Bore and is much better water than that from the Long Bennington Bore. Although we never had the slightest doubt with the Long Bennington supply from a Bacteriological aspect, physically it was not good. Many justifiable complaints were received of the water smelling and being of a brown colour, and I am sure that this new supply will be most welcomed by the consumers in the North of the area.

It will be seen from the accompanying tables that a rigid weekly check was kept on all sources of supply by sampling from various points of distribution. It will be also seen from the tables that there is still a small percentage of households still not enjoying mains water. The majority of these are premises that have no mains available, some have mains available but no connection. The latter are being "worked on", and every effort is made to talk them into connecting to the main before resorting to Statutory action.

During 1962 the Council built 12 houses and 33 bungalows. The bungalows are intended primarily for the Aged Persons and are fulfilling a much needed want in the District. The group bungalow scheme at Great Gonarby has proved to be a tremendous success and we now have aged persons living by themselves who know they are not alone but that there is someone readily available and on call whenever required. The Council have been fortunate in obtaining the services of Mrs. Richardson, the Warden. I have seen her on her rounds and it is not only a case of someone visiting, but someone who is always cheerful and ready to do any little thing she can to make their lives just that much happier. The greatest trouble of the aged is loneliness and this is experienced by the Staff who find that when they have to call to see these people they have to stay and talk to them and find it difficult to get away. Even a Council Official is a welcome visitor to some of these people living by themselves and who seldom have any one to talk to. These group schemes are going a long way to stop this and it must be comforting to them to know that they have someone on call who will come as a friend and help them.

In 1955 the estimated number of unfit houses in the district was 279. By the end of 1962, 619 houses had been represented as being unfit, of which 468 had become the subject of Demolition Orders or Closing Orders and 41 had been included in Clearance Areas. There are still more houses to be dealt with and when the staff is back to normal every effort will be made to deal with these.

Fiftyone Discretionary Grants and thirtyfour Standard, have been made during the year, and it will be seen that once again more grants were given for tenanted houses than for owner/occupied. Apart from being a gratifying aspect of the scheme it is the reverse of the National Average which shows the majority of grants are given to owner/occupiers. All preliminary enquiries with regard to grants are dealt with by the Public Health Inspectors who do all in their power to encourage people to take advantage of the Government Scheme. Many houses in this district have been made into perfectly fit houses with financial persuasion, houses that would otherwise have been demolished and the Council having to provide the tenants with a Council house.

I feel that not enough people are taking advantage of this scheme and that there are still a great many people who would be well advised to consult your officers with a view to modernizing their houses. Our advice is free and the enquirer is under no obligation to carry on with the scheme if he does not consider it to be justifiable. I often think that if we charged £5-5-0 for our opinion we should get more people coming along to see us.

The number of applicants on the Housing Register in December 1962 was 374 which is a decrease on the 1961 figure. There is still a great demand for bungalows both for the aged persons and the newly married couple who have not the money available to furnish a house. When the family is at the age when a three-bedroomed house is a necessity exchanges could be made with those tenants who have brought up their family in a three-bedroomed house and now find themselves living by their two-selves. We have many cases of two people living in three-bedroomed houses who would welcome a two-bedroomed bungalow.

With the taking over of the water supply by the Kesteven Water Board a distinct improvement was seen in the carrying out of Council House repairs. No more the call "all out - burst main", and the workmen have gone out in the morning knowing that except for a national disaster they will be able to start a job and finish it. This previously was not possible as burst mains were absolute priority and caused a great disruption of this service. The splitting up of the workmen into two gangs, one operating North and one South has been a distinct improvement and the two foremen concerned are doing everything that is expected of them. The appointment of a Housing Maintenance Officer in December has also been a great asset to the Department. Apart from relieving the Public Health Inspectors of part of their duties it has meant that a more personal supervision of the workmen can be carried out and complaints investigated more promptly. With over 1,300 Council houses the amount of work carried out increases from year to year, as the older the houses get, the more maintenance is required.

S E W E R A G E A N D S E W A G E D I S P O S A L .

During 1962 the Caythorpe scheme was completed and work being carried on in connection with the Ancaster, Long Bennington and South Witham schemes. It is hoped and expected that these three schemes will be in operation during the first half of 1963.

The Council have a very full programme of future works and are to be commended on their attitude to this most essential service. It is ludicrous to think that a man can fly round the earth at thousands of miles an hour and people are still using pail and vault closets in rural areas. Prehistoric man used a method of disposal not far removed from the present method. It is appreciated that the provision of sewers in villages is not cheap, in fact expensive, but so important from a Public Health point of view.

During 1963 it is hoped that work will commence on the sewers and sewage disposal works for Harlaxton, Woolsthorpe by Belvoir and Little Ponton, and the new works and additional sewers at Barrowby. It is also anticipated that permission will be received from the Ministry to commence work at Denton during this next year. The accompanying table shows the Council's present programme for new schemes and it is sincerely hoped that Ministry permission will be received in order that all the projects can be carried on without undue delays.

It is gratifying to note that the Grantham Borough Council are proceeding with their scheme to replace the existing method of disposal at Marston with a completely new works. Negotiations have already started with the Borough Council to take certain of our Villages into these proposed works at a saving to ourselves and also to the Grantham Borough. Whatever has been said in the past I am sure that the Council will co-operate in every way possible in this joint project.

During the year a Field Testing Outfit was purchased in order that we could make our own tests of the effluent from these works. Although it does not give such an accurate result as those obtained from the Analyst, it does give us a good indication of the quality of the effluent. Quarterly samples were taken and submitted to the Analyst and the Lincolnshire River Board took samples from time to time. Close co-operation was maintained with the River Pollution Officer and informal discussions took place from time to time and difficulties ironed out.

We still maintain the sewage works with two mobile gangs with two men on each vehicle. With the number of sewage works increasing the number of workmen must accordingly be increased and I appreciate the fact that the Council are giving this due consideration. I feel that it would be remiss of me not to refer to the men who actually operate the various works. They work well, but above all they take a great interest in their work and a bad sample from one of the works is a disaster to them and every effort is made by them to remedy the fault.

A Cesspool Emptying Service of one free emptying a year commenced on 1st April, 1962 and is working satisfactorily. This in some way compensates those Ratepayers who pay the general Sewerage Rate and do not enjoy the benefits of a sewer in their village. Again I would commend to you the two men on this vehicle. When I say that we get more compliments than complaints you will appreciate that these men are doing a good job of work.

Conversion Grants Approved during 1962.

Caythorpe	5	Lenton	2
Frieston	4	Long Bennington	6
Great Goncerby	2	Sedgebrook	1

Total Grants Approved 20.

S E W E R A G E A N D S E W A G E D I S P O S A L .

1. PARISHES WITH MODERN SEWAGE SCHEMES.

Allington.

Barkston (part only in West Street).

Claypole (with the exception of small parts of the east and west ends which are to be sewered and pumped into existing sewers).

Colsterworth.

Great Gonerby.

Great Ponton.

Ropsley.

Skillington.

Stoke Rochford.

Caythorpe.

2. SCHEMES UNDER CONSTRUCTION.

Long Bennington - completion expected March 1963.

Ancaster - completion expected March 1963.

South Witham - completion expected June 1963.

3. MODERN SEWAGE SCHEME NOW INADEQUATE - NEW SCHEME INCLUDED IN 1963-64 PROGRAMME.

Barrowby - Old sewage works to be replaced.

4. OTHER PARISHES IN 1963-64 PROGRAMME IN ORDER OF PRIORITY.

Harlaxton - Scheme submitted to Ministry.

Woolsthorpe-by-Belvoir - Scheme to commence early 1963.

Little Ponton - Scheme to commence early 1963.

Foston and Westborough - Subject to approvals being obtained, to be carried out immediately on completion of the Long Bennington scheme.

5. OTHER SCHEMES RECOMMENDED FOR PRIORITY.

Denton - Approved in principle at estimated cost of £42,000

Fulbeck - Approved in principle at estimated cost of £58,000

Sedgebrook - Approved in principle at estimated cost of £15,900 to discharge at Allington Disposal Works.

Carlton Scroop) Joint scheme approved in principle at estimated cost
Normanton) of £60,000 to discharge to existing Disposal Works at
Hough-on-the-Hill) Caythorpe, after enlargement.

Lenton) Joint scheme approved in principle at estimated cost
Ingoldsby) of £46,400 to one disposal site between the villages.

Old Somerby) Joint scheme approved in principle at estimated cost
Boothby Pagnell) of £43,500 to one disposal site at Boothby Pagnell.

6. NOTES ON OTHER PARISHES.

Welby, Londonthorpe, Honington, Barkston, Belton, Manthorpe, Heydour, Wisby, Oasby, Gelston, Hougham and Marston - These villages can be dealt with most effectively by linking up with the new Grantham Borough sewage system when this is constructed.

Burton Coggles - Report received from Parish but priority not yet determined.

M E A T A N D F O O D S.

Perhaps the most important aspect of all during the year was the closing of all the six private Slaughterhouses in the district at the end of January, 1962. All the Butchers affected now have their animals slaughtered in the new Grantham abattoir.

This was the end of an era as for eight years this most essential service has been carried out by the Public Health Inspectors. We pride ourselves on the fact that during this period 100% meat inspection has been carried out, which has at times necessitated overtime and weekend work. I feel that the opportunity should not be missed to express our appreciation of the very full co-operation we have received from the Butchers concerned. This happy association has resulted in a great saving of time and money to this Council.

The Cafes and Canteens were visited during the year and no major faults were found. Again a happy association exists between the Management and the Public Health Inspectors and it is found that a friendly chat suffices to have any faults rectified and on no occasion was formal action resorted to.

Owing to the pressure of work I do feel, however, that we have been unable to make the number of visits desired, and that more should be done in this most important aspect of Public Health.

Carcases Inspected and Condemned in 1962 from 6 private slaughterhouses.

	CATTLE	COWS	CALVES	SHEEP & LAMBS	PIGS

In every case where the registration is one of sale
and storage only, the Ice Cream is pre-packed and
purchased from a large manufacturer outside the area.
There are now no manufacturers in the area.

REFUSE COLLECTION AND DISPOSAL.

The fortnightly collection and disposal of refuse continued during the year. As from 1st April, 1962 a "back door" collection was instituted, and all dustbins were collected from the rear of the premises and the empty bin returned inside the curtilage of the property. This has been carried out by the increasing of the gangs from three to four on each vehicle and we are getting practically no complaints. In the days of the "kerbside" collection we were continually getting very justifiable complaints from the old and infirm members of the community, that they were unable to carry out their dustbins. Now this is no longer required of them and I am sure it is a distinct relief to them.

It has been found throughout the country that the "bulk" of domestic refuse is increasing. Too much paper and food is finding its way into the Dustbin. All our refuse is disposed of by tipping and a great deal of inconvenience is experienced by the paper blowing about and the food attracting rats on to the tips. The slogan of every Council at one time was "Burn Refuse and Save Rates" and this still applies. It is appreciated that some houses are fitted with the type of grate that will not burn paper and rubbish, but I do feel that a great deal can be done on the part of the Ratepayers in the district to cut down the bulk that we now collect.

It will be noted from the accompanying table that the amount of Waste Paper collected was less than last year, but that there was an increase in the amount of Metal and Rags collected. The Thames Board Paper Mills have accepted all the Waste Paper that we have been able to collect.

The Council are still contemplating the joint provision of a Refuse Destructor with the Grantham Borough Council and it is hoped that this project will be successful. It is becoming increasingly difficult to find old brick pits and quarries in which to carry out controlled tipping.

Last, but by no means least, I would like to place on record the work carried out by the men on the vehicles. We get very few complaints from the Ratepayers and this speaks for itself of the efficient way in which the work is carried out.

1 9 6 2

Waste Paper	124 tons 12 cwt.	£1010 1 0
Metal and Rags	11 tons 8 cwt.	£ 172 1 6
	Total value realised	<u>£1182 2 6</u>

1 9 6 1

Waste Paper	140 tons 3 cwt.	£1159 2 4
Metal and Rags	7 tons approx.	£ 120 3 6
	Total value realised	<u>£1279 5 10</u>

1 9 6 0

Waste Paper	124 tons 4 cwt.	£ 997 12 3
Metal and Rags	8 tons approx.	£ 151 4 6
	Total value realised	<u>£1148 16 9</u>

1 9 5 9

Waste Paper	87 tons 16 cwt.	£ 754 9 3
Metal and Rags	10 tons approx.	£ 173 0 0
	Total value realised	<u>£ 927 9 3</u>

1 9 5 8

Waste Paper	89 tons 14 cwt.	£ 774 9 0
Metal and Rags	4 tons approx.	£ 73 9 6
	Total value realised	<u>£ 847 18 6</u>
